Build Five Valleys Landscaping

Brief
To develop part of the garden behind a traditional rural cottage. The clients asked for a sheltered dining and entertaining area. They wanted a pond and water feature and more structured planting. Background noise from the nearby M5 was a problem.

Design
Formal and symmetrical, with combined brick and stone hard landscaping and a trellis screen punctuated by deep arches. A green oak pergola provides height and shelter and the cruciform pond with stepping-stones is the centre piece of the garden. The design gives a sense of enclosure and there is the gentle sound of running water.
