**Build:** Mulberry Landscaping & Planting

## Brief

To create a classic formal garden behind a stone cottage. On several levels, within new walls of hand-made bricks, it was to be private and easily maintained. They wanted well defined areas including a small lawn and a sheltered place to sit.

## Design

It includes a wall mounted water spout falling into a small pond, bespoke hardwood trellising with garden mirror, lighting throughout the garden that washes walls and highlights plants, and spaces for their garden statuary and antique seats. The planting includes formal clipped evergreens, ivies, ferns and lilies. The Photographs were taken before the planting was completed.
