**Design** Vivid Garden Design

**Build** Vivid Garden Design

### The Brief

To improve a narrow part of the garden between a modern house and boundary brick wall. The area was in permanent shade with poor-draining clay. The client, a pianist, wanted something quirky that would look intriguing from the side entrance to the house.

### The Design

Based on a piano keyboard it has a curved path of black timber and white gravel. Raised beds are planted with purplish-black, cream, white, and sharp green shade tolerant plants. A metal pergola, with musical notes, between house and wall supports clematis, jasmine and Persian ivy.
