Build Vivid Garden Design

The Brief

To develop the long narrow garden behind a rural terraced cottage. The client wanted a low maintenance garden with an all-weather area outside the kitchen and more visual interest. He also requested an 'oriental' garden to remind him of his travels.

The Design

There is a semi-circular flying deck and a pergola for climbing plants, with a silvered globe water feature in a pool surrounded with ferns. A separate area, created with red and black screens, is planted with bamboo, a tree paeony, rice paper tree and a magnolia set amongst gravel and rocks.
