Build Vivid Garden Design

The Brief

To make an enclosed cottage garden within the existing larger garden behind the house. The client, a skilled gardener, wanted plenty of space for planting, a small wildlife pond and a sheltered place to sit.

The Design

Mature ornamental shrubs and a glasshouse were integrated into the new garden. Protected by woven hazel hurdles, there are seating areas to catch morning and evening sun and a wildlife pond linked by a curving path and a pergola arch supporting climbing roses.
