Client's comments

“ My wife & I recently purchased a house to coincide with the arrival of the birth of our sons. A garden is a key feature of any house. We wanted something that would be different, eye catching, playful and low maintenance but we didn't know where to start or what to do. Fortunately for us we came across Will & Vivid Garden Design. From the outset of our discussions regarding the design of our garden we found Will to have a great understanding of our requirements and he was full of ideas of what we could do.

Our Garden is amazing and I want to express how happy we are with it. Recently the previous owner of the house called in and they were astounded with the garden. There were many key elements of the process. I was grateful for Will's input - clearly for the design but also for the sourcing of the materials and the project management of the work ensuring that all the fine details were adhered to.

If you are in the market for changing the look of your garden I would without hesitation recommend meeting with Will you will be inspired. ”

“ We have a very small garden and before Will re-designed it there was nothing to look at except the shed. Now it seems much bigger with a pond and waterfall, a curving gravel and stone path and beautiful plants all year round.

We all love it. ”

“ Will was recommended to me by a friend. I asked him to redesign part of my existing garden into a cottage garden. It is the best thing I ever did! It gives me everything I need – a natural pond, generous beds for all the plants I grow and places to sit to admire the flowers and watch the wildlife that shares the garden with me. ”

Jill Miles

“ We were thinking of revamping part of our cottage garden when we saw Will's stand at Frampton Show. We are very pleased that we asked him to come and do a preliminary survey. He arrived and listened to our thoughts and ideas, made suggestions and came up with a superb design that incorporated all we asked for. ”
